“Proper ventilation can lower the attic temperature by as much as 50°F, which significantly reduces the home’s heating and cooling demands.”

-U.S. Department of Energy

Ridge Vent Exhaust

Soffit Intake

Must be equal to or greater than the NFA of the ridge vent.

Shown in TruLine®
HP-Series, 19.6 NFA, for
a combined 39.2 on both sides

The Significance of Proper Ventilation

Ventilation is what the TruLine® HP-Series Soffit is all about. It is important that a homes ventilation system be balanced, which means the soffit needs to intake more air than is exhausted through the roof vents. If your roof vent system provides a 19 NFA rating then you should use a vented soffit that provides at least a 10 NFA on both sides of the house, for a combined NFA of 20.

Criteria	TruLine® HP-Series Soffit	Benefit
Min of 10 NFA	19.6 NFA	Increased Airflow to help lower energy costs
System of Colors	28 System Colors	Trim Colors and Siding Colors
Options	10 Profiles	Offers the look you want with the ventilation you need
Enhancers/Accessories	5 Designs	Details that make a statement
Woodgrain Finish	5 Colors	Architectural Options

The Science behind TruLine® HP-Series 19.6 NFA rated Soffit:

More Lances per foot
 Deeper Lances + Longer Lances

QE vs Typical Lanced Aluminum Soffit

Lower Energy Costs/Reduced Mold

12" NonVented

12" Center Vented

12" Fully Vented

16" NonVented

16" Center Vented

When TruLine® HP-Series Soffit was on the drawing board our goal was to **double the amount of airflow** (NFA) that was being offered by other products available in the market. Most soffit panels didn't (and still don't) provide enough air intake to work with common roof ventilation systems.

As a result, we created an **amazing new soffit** and **almost tripled the amount of NFA**. Each TruLine® HP-Series panel delivers over **644 carefully sculpted intake vents** per foot—that's **over 120,000 individual vents per house**, providing more air flow than people ever had before. It's gone on to be **the highest rated soffit panel in the industry**.

Each TruLine® HP-Series Soffit panel is made from a **Titanium Stabilized Aluminum Alloy** and is available in **eleven profiles**.
